

Press release

CHIMCOMPLEX S.A. BORZEȘTI announces the start of the implementation of the project “Installation of a photovoltaic power plant at Chimcomplex S.A. Borzești - Dej 2”, SMIS Code 330382, following the signing of the financing contract no. 1534 dated 21.04.2026, concluded with the Ministry of Energy, acting as the national authority responsible for the implementation and management of the funds allocated to Romania through the Modernization Fund.

The project will be implemented starting on 21.04.2026 until the commissioning of the photovoltaic power plant, respectively 31.12.2026.

The total value of the project is 21,452,922.68 lei, out of which 10,200,439.01 lei represents non-reimbursable funding from the Modernization Fund.

The investment will be located in 3 areas of the cellulose plant - Chimcomplex S.A. Borzești, totaling an area of approximately 130,635 sqm and involves the installation of a photovoltaic power plant that will provide approximately 73.4% of the total electricity consumption of the industrial platform.

The general objective of the project is the installation of a new renewable electricity generation capacity for self-consumption at Chimcomplex S.A. Borzești, Dej site - Cellulose plant (Physical-chemical wastewater treatment plant and Water treatment plant).

The specific objectives of the project are:

SO1: Installation of a new renewable electricity generation capacity by implementing a photovoltaic power plant with a total installed capacity of 4.95 MW and a 1 MWh storage installation at Chimcomplex S.A. Borzești - Dej 2 platform - Cellulose plant (Physical-chemical wastewater treatment plant and Water treatment plant);

SO2: Annual reduction of greenhouse gas emissions by 3,134.84 tons of CO₂ equivalent at Chimcomplex S.A. Borzești - Dej 2 platform - Cellulose plant (Physical-chemical wastewater treatment plant and Water treatment plant);

SO3: Increase in the average annual renewable electricity production by 5,123.13 MWh/year at Chimcomplex S.A. Borzești - Dej 2 platform - Cellulose plant (Physical-chemical wastewater treatment plant and Water treatment plant);

SO4: Increase in the total renewable electricity production by 102,462.60 MWh for the reference period;

SO5: Use of 73.4% of the total renewable energy production for self-consumption at the Dej 2 platform (5,181.31 MWh/year);

SO6: Installation of a photovoltaic power plant with a capacity factor of 12.86% at Chimcomplex S.A. Borzești - Dej 2 platform - Cellulose plant (Physical-chemical wastewater treatment plant and Water treatment plant).

The main activities of the project are: A1. Ensuring project management, A2. Carrying out project information and publicity activities, A3. Implementation of the core investment and A4. Carrying out financial audit activities.

By installing the 4.95 MW photovoltaic power plant with a storage capacity of 1 MWh, CHIMCOMPLEX S.A. Borzești confirms its constant commitment to the development of the energy efficiency sector and to reducing CO₂ emissions, in line with national, European, and international objectives.
